

Wireless Configuration Instructions for Blackberry

These instructions will configure your wireless connection to the TMU wireless network. It will allow you to authenticate and browse using a higher level of security and protection. It will also automatically log you in after your first connection – no need to login and authenticate every time you come onto campus.

1. From your main home screen, click your Blackberry Button. In some new models (e.g., Blackberry Torch), pressing the button may show another menu. Please select **Open Tray** option of this menu to go to the main menu screen shown in step 2.

2. Find your Wi-Fi icon, which is titled “**Manage Connections**”, and open it by clicking enter or push in on your trackball.

3. In the **Manage Connections** window scroll down to **Set Up Wi-Fi Network** and click **Enter** or push in on your trackball.

4. Click **Scan** for Network in the newly opened window. For some new models skip directly to step 5.

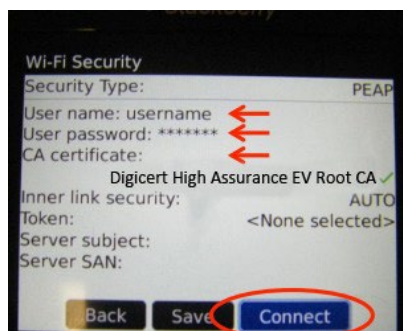

5. In the new window, scroll around to find the **TMU** network and click **Enter** or push in on your track ball.

6. When prompted for credentials, please enter your torontomu username and password - please note that your student number is not a valid username to be used for the TMU connection.
 - a. CA certificate – Select the **Digicert High Assurance EV Root CA** certificate
 - b. Leave all remaining fields empty

Click **Connect**.

7. Your Blackberry will now attempt to connect. If all the information is correct you should successfully be connected within a few moments.

8. You will now be connected to the TMU network. Click **Finish**.
Your Blackberry will automatically connect to the network when within range of the signal.
