

# Cisco Jabber – Android & iOS

Cisco Jabber is an application that allows you to make and receive phone calls on your computer and mobile device.

## Quick Access:

[Step 1: Download Cisco Jabber for Android & iOS](#)

[Step 2: Install Cisco Jabber for Android & iOS](#)

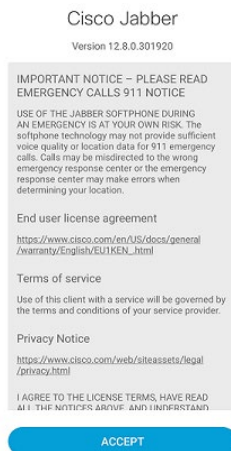

---

## Step 1: Download Cisco Jabber for Android & iOS

1. Download Cisco Jabber directly from the **Apple App Store** or **Google Play Store**.
2. Once downloaded, launch the application.

## Step 2: Install Cisco Jabber for Android & iOS

1. Read the end user license agreement and terms of service and select **Accept**.

2. Scroll through the Jabber introduction windows by swiping left to the fourth page and select **Get started**.

Join Meetings Faster and Easier  
Now you can join your meetings right from Jabber.

3. You may choose to **Allow** or **Deny** Jabber access to your contacts; make and manage phone calls; access photos, media and files on your device; record audio; and stop optimizing battery usage based on your functionality.
4. On the initial Jabber screen, enter your torontomu username followed by “@torontomu.ca” and click **Continue**. For example, you would enter your.name@torontomu.ca.

5. Next, enter your torontomu username and password and select **Sign In**. In this instance, you would enter “your.name” and omit “@torontomu.ca”.

You'll know you have signed in successfully when you get past the sign-in screen. The Cisco Jabber application opens by default to the Contacts screen. If you cannot sign in, please contact the [Computing and Communications Services Help Desk](#) for assistance.
