

Cisco Jabber - Mac

Cisco Jabber is an application that allows you to make and receive phone calls on your computer and mobile device.

Quick Access:

[Step 1: Download Cisco Jabber for Mac](#)

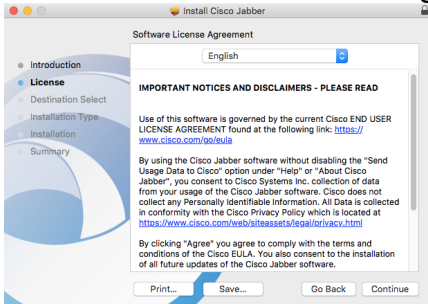

[Step 2: Install Cisco Jabber for Mac](#)

Step 1: Download Cisco Jabber for Mac

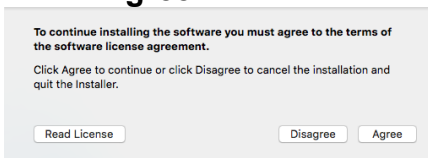

1. Download the Cisco Jabber client for Mac with the following link: [CiscoJabber.pkg](#).
2. On the TMU login screen, enter your torontomu username and password. Click **Log in**.
3. On the File Download screen, click the **Save** button to save the zip file to a location where you can easily find it such as your desktop or your Local Disk (C:).

Step 2: Install Cisco Jabber for Mac

1. Once the file has downloaded, select and install the CiscoJabber.pkg file. When prompted, select **Continue**.
2. Read the Software License Agreement and select **Continue**.

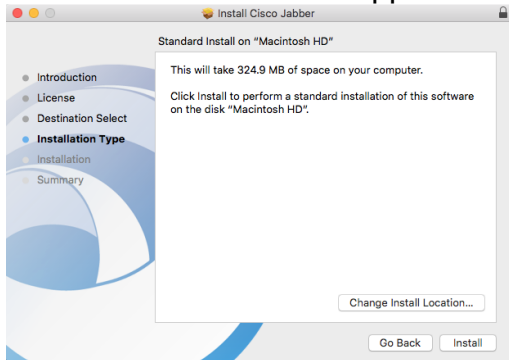

3. Select **Agree**.

4. Select **Continue**.

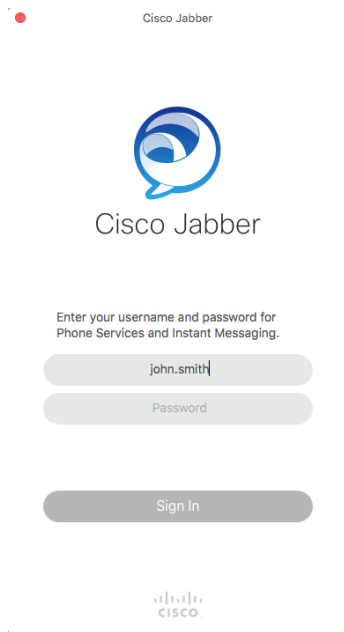

5. Select **Install**. Once the application finishes installing, select **Close**.

6. Launch the application.
7. On the initial Jabber screen, enter your torontomu username followed by "@torontomu.ca" and click **Continue**. For example, you would enter your.name@torontomu.ca.

8. Next, enter your torontomu username and password and select **Sign In**. In this instance, you would enter “your.name” and omit “@torontomu.ca”.
