

Jill Powers

Infrastructure and
Regulatory Policy Manager,
California Independent
System Operator

Jill Powers has been with the California ISO for over fifteen years during which she has held a variety of leadership positions supporting grid and market operations including early design of energy markets facilitated by the organization. .

As an Infrastructure and Regulatory Policy Manger, her current focus is on policy and modeling development advancing distributed energy resources in the CAISO wholesale markets further enabling diverse technology participation.

Most recently she was a leader in the successful completion of Distributed Energy Resource Provider (DERP) and Energy Storage/Distributed Energy Resource (ESDER) policy initiatives which advances the development of CAISO tariff and business processes to support increased distributed resource provision of services in the wholesale market.

Jill holds a Bachelor of Science degree in Mechanical Engineering and a Master of Science Degree in Computer Information Systems.
