

DESIGN

SUBMIT FILES AS .AI OR .PSD IN CMYK

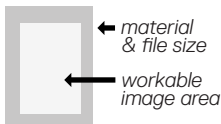

YOUR ART-BOARD MUST MATCH THE SIZE OF YOUR MATERIAL

↓ UNLESS ↓

You want the image to extend to the edge of the material. If so, you need to add 0.125" bleed to your image.

If you are printing on fabric, match your file size to the material, and add a 2" border to your file. This allows us to tape down the material.

Suggested Software:
**Photoshop
Illustrator**

OUR UV
PRINTING
TEMPLATES!!

!! **EMBED YOUR IMAGES** and outline your fonts!

SPOT COLOURS

If you want to print with white or clear ink you will need to follow specific steps in setting up your file. Instructions can be found in our templates or on p.8 of our printing guide.

PRINTING VARIATIONS

You will need to make decisions on order of printing, types of inks and number of passes. Please visit p.6 of the UV Printing guide for details.

SUGGESTED FORMATS

to work within: 24"x 24", 24"x 48", 48"x 48" & 48"x 96". This will ensure optimal vacuum hold for your piece.

UV PRINTING

PRICING

JOB COST IS CALCULATED
ACCORDING TO:

INK

Varies depending on surface coverage. Using lots of black or spot white will significantly increase the price.

+

TIME

\$0.46 PER MINUTE

This includes the time it takes the technician to fix, set-up and print your file.

+

MATERIAL

The cost varies by kind, thickness, size, and amount.

Using your own material has no charge.

WE CAN PROVIDE AN APPROXIMATE QUOTE FOR INK USE. TO DO SO, YOU NEED TO HAVE A WORKING FILE ON HAND.

FULL LIST OF MATERIALS WITH PRICING IS AVAILABLE ON OUR WEBSITE!

THE LAB ONLY ACCEPTS ONECARD AS PAYMENT

we recommend loading your One-Card beforehand which can be done in-person @ the OneCard office, @ the campus PHIL machines, or online. Link with this QR code:

MATERIALS

YOU CAN PRINT ON MATERIAL WE HAVE IN
THE SERVICE BUREAU OR BRING YOUR OWN.

Your own material needs to be approved by a technician and must be **under 4" in height, 48" in length and 96" in width.**

WE HAVE PRINTED ON

ACRYLIC	DENIM	3D PRINTS
WOOD	COTTON	CERAMIC TILES
GLASS	ORGANZA	CARDBOARD
PET-G	PAPER	FOAM CORE
METAL	GRIP TAPE	REAL LEATHER
CANVAS	STYRENE	POLYCARBONATE

NO HEAT SENSITIVE MATERIALS

FOR FABRICS

You need to iron, cut any flyaways and cut the material as straight as possible. Any ironing of the material will be added to the time taken to complete the projects.

Rigid and stiff fabric is easier to print on.

Inks will fade away significantly after one wash. Ink will hold onto fabric but will flake off over time when worn and manipulated.

Always bring extra material.

For unusual material and first-time users of UV printing we **strongly suggest doing a test**. A test is done to verify resolution, material outcome, colour, scale & concept.

Your material needs to be as flat as possible!

The printer passes 1mm over your material. No room for error!

SUBMISSION & PICKUP

BOOK AN APPOINTMENT
VIA OUR UV PRINTING
BOOKING FORM.

APPOINTMENTS CAN ONLY BE BOOKED MORE
THAN 24 HOURS IN ADVANCE

WHEN SUBMITTING

Submit your files as an Adobe .AI or .PSD. Embed your images, outline your fonts, and add a bleed if needed.

ONCE YOU BOOK

Your file gets scheduled to the D+TL calendar. Keep an eye on your email as staff may reach out with questions, concerns or any issues.

IF YOU ARE RUNNING A TEST

Please be sure to come with extra material for testing. This testing time will count towards your printing time.

AFTER BOOKING

Be on time for your appointment and ensure that your material is ready for printing!

YOU MUST BE PRESENT AT YOUR UV PRINTING APPOINTMENT!

If you do not come to your scheduled time, your appointment will be cancelled!
