

## Opportunity Knocks! Now Hiring: Structural Packaging Designer

**Department:** Prepress | **Schedule:** Full-time, 40 hours/week

**Reporting to:** Director of Operations

**Location:** 335 Steelcase Rd E

Do you dream in dielines and bring packaging to life with precision and purpose? We're looking for a Structural Packaging Designer to join us and bring expert-level technical know-how to our creative and production teams.

### In this role, you'll:

- Design and prototype dielines for folding cartons, corrugated boxes, and flexible packaging
- Create standardized dielines that can be re-used for a range of industries including food, cannabis, health, pet care, and more
- Evaluate and improve existing packaging for functionality, cost-efficiency, and visual appeal
- Work directly with clients to assess packaging needs and recommend suitable dieline solutions.
- Ensure all dielines meet engineering, aesthetic, and functional requirements before production.
- Create detailed setup guides for artwork, including layout recommendations and compliance standards

### What you bring to the table:

- Proficient in packaging design software such as AutoCAD, ArtiosCad, Adobe Illustrator, or similar tools
- Needs to be able to create dieline for multiple Materials. (SBS stock, corrugated etc) and to be able to adjust dielines from one material to another
- Experience with Konsberg/Zund
- Strong communication skills for cross-functional teamwork and client collaboration
- Precision, creativity, and the ability to juggle multiple deadlines like a pro
