

Job Title: UX UI Designer

Location: In-house at 25-2450 Lancaster Road Ottawa ON - in Office only

Date Published: May 5, 2026

Job Description:

We are looking for a UX/UI Designer to create intuitive and visually compelling web and mobile application designs. You will work closely with developers, product managers, and stakeholders to design user-friendly interfaces that enhance engagement and conversions.

Must-Have:

- Experience working with Flutter and Next.js
- Portfolio including samples working with Google Flutter Materials and Designs.

Key Responsibilities:

- Design wireframes, prototypes, and user flows for web and mobile applications.
- Conduct user research and usability testing to inform design decisions.
- Collaborate with developers to ensure seamless implementation of designs.
- Optimize UI for responsiveness, accessibility, and performance.
- Stay updated on design trends and best practices.

Requirements:

- Proven experience in UX/UI design for web and mobile applications.
- Expert designer with Figma.
- Strong understanding of user-centered design principles.
- Portfolio showcasing web and mobile design projects.

Bonus:

- Experience in Working with Design Editors for Mass Personalization.
- Experience in Web to Print.
- Experience in SVG Formatting and Adobe InDesign.
