

## 2018-19 Incremental Project Grants Outcomes Report

<b>Project Name</b>	<b>Objectives</b>	<b>Indicators</b>	<b>Actual Results/Outcomes/Impacts</b>
Open research and data portal project	To further advance open science and open access scholarship	Impact metrics derived from increased open data and research data management	Knowledge mobilization is best achieved via open science and open access publishing. The Library was able to advance open access publishing at Ryerson by a number of means including the support of faculty output in open scholarly publication vehicles. Research published under an open licence receives greater exposure and impact, because it is free of tolls and more restrictive licenses. Biomed Central is a leading open access publisher with demonstrated impact and reach.
Increased commercialization supports	To increase commercialization and technology transfer involvement by faculty members and students to enhance impact of SRC activities	Number of invention disclosures filed	58 Disclosures Filed  Led to filing of 13 Patent Applications inclusive Provisional to Full Patent Filings
