POLICY 126: PERIODIC PROGRAM REVIEW FOR GRADUATE AND UNDERGRADUATE PROGRAMS

PROCEDURES

This document outlines the sequential stages of the Periodic Program Review (PPR) including the self-study report, the peer review and report, responses to the Peer Review Team (PRT) Report, assessments, endorsements, and approvals of undergraduate and graduate PPRs and implementation of recommendations. The key outcome from a PPR is the Final Assessment Report and associated Implementation Plan, which become the basis of a continuous improvement process through monitoring of key performance indicators.

1. THE SELF-STUDY REPORT

The self-study has descriptive, explanatory, evaluative and formative functions. It provides an opportunity for programs to assess academic quality and societal need, and plan for continuous improvement. It is essential that the self-study is reflective, self-critical, analytical, forward looking, and that it actively involves faculty, students, and staff in the process.

The self-study clearly identifies which program(s) is/are the subject of review, includes a description of how the self-study was written (i.e. the process), and explains how input was received from faculty, staff and students. The Director, Curriculum Quality Assurance and the YSGS Associate Dean, Programs, as appropriate, will advise programs throughout the review process on matters of content and format and to ensure that policy requirements are met.

Views of employers and/or professional associations incorporated into the self-study process will be solicited via methods deemed relevant and meaningful by the program and made available to the PRT committee. Some examples include surveys, interviews, or focus groups.

The timing and nature of the PAC consultations can vary depending on the program and its specific requirements. In some instances, it may be advantageous to seek input from the PAC earlier in the process and incorporate the feedback into the self-study report. In other cases, the Faculty Dean or Dean of Record may present the endorsed self-study report and its appendices, along with any qualifications or limitations, to the Program Advisory Council (PAC) for its review and comments. In all instances, a record will be kept of the date(s), minutes, and members attending the meeting(s). The Cyclical Review of undergraduate and/or graduate programs that were undertaken within the period since the conduct of the previous Audit are eligible for selection for the university’s next Cyclical Audit.
APPENDIX I

Choosing Arm’s Length Reviewers

Best practice in quality assurance ensures that reviewers are at arm’s length from the program under review. This means that reviewers/consultants are not close friends, current or recent collaborators, former supervisor, advisor or colleague.

Arm’s length does not mean that the reviewer must never have met or even heard of a single member of the program. It does mean that reviewers should not be chosen who are likely, or perceived to be likely, to be predisposed, positively or negatively, about the program.

Examples of what may not violate the arm’s length requirement:

- Appeared on a panel at a conference with a member of the program
- Served on a granting council selection panel with a member of the program
- Author of an article in a journal edited by a member of the program, or of a chapter in a book edited by a member of the program
- External examiner of a dissertation by a doctoral student in the program
- Presented a paper at a conference held at the university where the program is located
- Invited a member of the program to present a paper at a conference organized by the reviewer, or to write a chapter in a book edited by the reviewer
- Received a bachelor's degree from the university (especially if in another program)
- Co-author or research collaborator with a member of the program more than seven years ago
- Presented a guest lecture at the university
- Reviewed for publication a manuscript written by a member of the program

Examples of what may violate the arm’s length requirement:

- A previous member of the program or department under review (including being a visiting professor)
- Received a graduate degree from the program under review
● A regular co-author and research collaborator with a member of the program, within the past seven years, and especially if that collaboration is ongoing

● Close family/friend relationship with a member of the program

● A regular or repeated external examiner of dissertations by doctoral students in the program

● A recent doctoral supervisor (within the past seven years) of one or more members of the program

ADDITIONAL ADVICE FOR CHOOSING EXTERNAL REVIEWERS

External reviewers should have a strong track record as academic scholars and ideally should also have had academic administrative experience in such roles as undergraduate or graduate program coordinators, department chair, dean, graduate dean or associated positions. This combination of experience allows a reviewer to provide the most valuable feedback on program proposals and reviews.
