

Formulating a Definition of Green G

When developing policies or solutions, **definitions** are not words, but **tools**.

Increasing Digitization While Conducting a 'Green' Transition

General Systems Process of Attempts to Have a Green Transition

VPPAs

The buyer will finance a renewable energy project with a renewable energy developer. The developer promises builder a fixed rate for renewable energy. If actual rate is below the fixed rate, buyer makes up the difference. If actual rate is above the fixed rate, developer makes up the difference. Renewable energy goes into the power grid, where it is purchased by the buyer. Buyer received renewable energy certificates which can be used to offset emissions.
