**Course ID** 026674  
**Short Title** Contract Law  
**Long Title** Contract Law  
**Long Descr** Contract law provides a creative opportunity to clarify expectations and interests in a legally enforceable way. Working with real contracts from diverse sources, students are trained in contract fundamentals (formation, performance, breach, and remedies) and are introduced to the use of contracts in a variety of legal areas. Students apply these principles both in reviewing and drafting contract clauses and to critically assess emerging topics such as electronic, "smart" and self-executing contracts.

**Short Title** Tort Law

**Long Title** Tort Law

**Long Descr** Tort law deals with the apportionment of responsibility for harms caused by individuals, companies and government. This course examines intentional and unintentional wrongs, and the central role that recovery and damages play in redress. Students learn to recognize wrongs and how to anticipate, avoid or address legal risk. They apply these principles in reviewing and drafting pleadings, and explore how principles of responsibility are challenged by non-human actors (e.g. AI, autonomous vehicles).

**Short Title** Property Law  
**Long Title** Property Law  
**Long Descr** Property law deals with ownership, possession, and control of tangible and intangible interests that offer value to individuals, companies and the state. Students analyze competing claims to various types of assets, and are introduced to the economic, moral and other arguments used to support those claims. They are given the opportunity to apply these principles in cases involving the infringement of property rights and explore comparative views of concepts of property in Indigenous law.

**Short Title** Ethics and Professionalism  
**Long Title** Ethics and Professionalism Intensive  
**Long Descr** Legal ethics and professionalism explores the tensions that arise domestically and internationally from balancing professional role-based obligations, organizational expectations and the public interest. Students consider behaviour and responsibilities generated by rules of professional conduct and situate legal professionals in a broader societal context. They learn to recognize and address ethical dilemmas they encounter in various practice settings, including novel challenges arising in technologically-mediated environments.

**Short Title** Adm. and Reg. Law

**Long Title** Administrative and Regulatory Law

**Long Descr** : Issues in administrative law and regulatory law are commonly encountered, due to their influence on everyday interactions between individuals and government entities. Regulatory law covers delegated rule-making, policy development and adjudication. Students learn about regulatory practice and principles of judicial review, as well as how to provide advice to individuals and corporations on complex rules, regulations, procedures, permitting, applications and enforcement. The role of the compliance function and rise of "RegTech" are also explored.

**Short Title** Critical Race Theory

**Long Title** Critical Race Theory

**Long Descr** This course examines race, racism, law, and social change, through the lens of Critical Race Theory. It examines what "race" signifies (e.g., biology, culture, social construction, ethnicity, and Indigeneity) and what "racism" signifies (e.g., intentional racism, race neutrality/consciousness, systemic racism, coded racism, racial privilege, and racial bias). Students will complicate and critique various "anti-racism" strategies, and unpack the imbrication of social hierarchies (e.g., gender, class, sexuality, religion, disability, and immigration).

**Short Title** Gender, Sexuality, and the Law

**Long Title** Gender, Sexuality, and the Law

**Long Descr** This course explores the legal regulation of gender, sex, and sexuality from historical and contemporary perspectives. Focusing primarily on Canadian law, with occasional dives into English legal history and contemporary American law, the course brings together specific cases and statutes that have established and partially dismantled gender and sexual hierarchies; and it places those legal documents alongside theoretical analyses of the roles played by law in the production of sexual subjectivities and gendered selves.

**Short Title** Criminal Procedure  
**Long Title** Criminal Procedure  
**Long Descr** This course begins with a survey of the source and limits of police investigative powers, focusing on the Canadian Charter of Rights and Freedoms and motions for the exclusion of illegally obtained evidence. The course examines pre-trial processes, including bail, (non-) disclosure, crown and judicial conferences, and election and plea (bargaining) before moving on to jury selection, trial procedure, examination/cross-examination of witnesses, and sentencing. Attention is also paid to appeals and select specialized court proceedings.

**Short Title** Tax Law and Practice

**Long Title** Tax Law and Practice

**Long Descr** This course introduces tax principles in the Income Tax Act, as they pertain to four major types of taxpayers/entities: individuals, corporations, trusts, and partnerships. Topics covered include residency, employment and business income/deductions, capital transactions, dividends, the theory of integration, corporation-specific transactions (rollovers and reorganizations), and civil & criminal penalties. Also included is an overview of international tax principles (tax jurisdiction, tax treaties, transfer pricing, and e-commerce). In addition, application of AI in tax is addressed.

**Short Title** Evidence  
**Long Title** Evidence  
**Long Descr** This course imparts the basic principles of evidence law in the civil and criminal context, including hearsay and its exceptions, as well as relevant implications of opinion, character, and expert evidence. Students learn about the distinctive ways that legal processes treat matters of evidence and the connections between rules of evidence and rules of civil and criminal procedure. They also look at the growing role of electronic evidence and the use of social media as evidence.

**Short Title** Law and Injustice  
**Long Title** Law and Injustice  
**Long Descr** Law is often implicated in injustice, rationalizing inequalities, domination, cruelty, and neglect. And yet, marginalized groups continue to turn to law as an instrument of social change, sometimes successfully. This course explores the nature and experience of injustice through its tense relationship to law. Relying on a mixture of theoretical perspectives on law as well as experiential learning modules, it equips students to think about law and justice in creative ways.

**Short Title** Law of Armed Conflict

**Long Title** Law of Armed Conflict

**Long Descr** The Law of Armed Conflict, also known as International Humanitarian Law, sets out rules that aim to limit the harmful effects of armed conflict. This course will seek to explore the evolution of the laws of war from their origins to their modern day application. Students will be introduced to the law's main sources (the Hague and Geneva Conventions, findings of international criminal tribunals), key concepts (international/non-international conflicts, combatants/noncombatants, protected persons) and the principles that aim to limit the means and effect of combat. The course will examine how the law of armed conflict is implemented, as well as the availability and efficacy of remedies. We will draw upon case studies, such as the use of drones and the transfer of detainees, to analyze the potential and the limits of the humanitarian law model.

**Short Title** Competition Law and Policy

**Long Title** Competition Law and Policy

**Long Descr** Competition law is concerned with creating and maintaining competitive, efficient markets. It is thought that such competition can deliver lower prices and more choice for consumers, and promote innovation within the Canadian economy more broadly. Competition law attempts to achieve these objectives by targeting price fixing and other anti-competitive agreements, by reviewing mergers that may unduly restrict competition, and by providing certain remedies against dominant firms that may wield their market power to exclude competitors and create barriers to entry. This body of law spans regulatory norms, criminal offences, and private law.
