

<p>Indicator 4: Experiential Learning <i>a. Percentage of programs with formal experiential component, including co-op, internship, work/field/clinical placement.</i> <i>b. Percentage of students participating in such activities in a given year.</i></p>	
<p>Direct Indicator of:</p> <ul style="list-style-type: none"> • currency and relevance of curriculum 	<p>Related to:</p> <ul style="list-style-type: none"> • quality of student experience • societal need (industry/professional component)
<p>Comments: This indicator bears upon Toronto Metropolitan University's commitment to provide a high level of applied, experiential learning.</p>	
<p>Related Statistic: Percentage of programs that provide opportunity for international experience, and number of students participating in international activities in a given year.</p>	
<p>Issues: Calculation of Indicator 4b has been deferred. Current data sources do not provide adequate information on the extent of the experiential component on a student-by-student basis. Indicator 4a provides similar information by classifying programs of study but there is variation in the definition of the experiential component across programs. New data collection would be required to obtain data on the numbers of students participating in international activities (or having an opportunity to participate).</p>	

Indicator 4a
