Universal access [2]						
Care over time/life cycle care [2]						
Childbearing and postpartum	●	●	●	●	●	●
Women's health, sexual health, reproductive health, child care	●					

[1] Your answers may vary from these. This is the interpretation of the author of this learning module. Compare and contrast your analysis to this summary.
[2] Note: None of these definitions indicate universal access or care over time/life cycle care. In Ontario, midwifery care is available to all residents in Ontario, including those who are medically insured. Access to midwifery services is limited due to insufficient midwives to meet demand or lack of available services in all communities in Ontario.
